Office Action Summary	Application No. 10/673,093	Applicant(s) BROWN ET AL.	
	Examiner Lyle A. Alexander	Art Unit 1743	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-40 and 56-60, drawn to a method of selecting at least one performance property and at least one homogeneous interaction parameter, classified in class 436, subclass 55.
- II. Claims 41-55, drawn to a method of selecting at least one probe particulate material derived from an interfacial potential property, classified in class 436, subclass 56.
- III. Claims 61-77;109-113 and 130-132, drawn to a method of selecting at least two performance properties and at least one homogeneous interaction parameter, classified in class 436, subclass 55.
- IV. Claims 78-82, drawn to a method of selecting at least one performance property of two or more compositions and at least one homogeneous interaction parameter, classified in class 436, subclass 55.
- V. Claims 83-108;114-129 and 133-134, drawn to methods of performance mapping, classified in class 436, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, invention I to a method of selecting at least one performance properties and at least one homogeneous interaction parameter that has a different mode of operation.

Inventions II and III-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, invention II is a method of selecting at least one probe particulate derived from an interfacial potential property that has a different mode of operation.

Inventions III and IV-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, invention III is a method of selecting at least one performance property of two or more compositions and at least one homogeneous interaction parameter that has a different mode of operation.

Inventions IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions of group IV is to a method of selecting at least one performance property of two or more compositions and at least one homogeneous interaction parameter that has a different mode of operation.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their

Art Unit: 1743

recognized divergent subject matter, restriction for examination purposes as indicated is proper.
